## Google Form Field-to-File Mapping

| Form Field | File to Upload / Value | File Description |
|---|---|---|
| **1. Code File *** | `scanner.py` *(or `Code_File_Scanner.pdf`)* | Zero-dependency Python 3 security scanner with headers audit, active CORS probes, and reporting. |
| **2. Requirements File *** | `requirements.txt` | Requirements specification documenting standard library execution and development tools. |
| **3. Project Report *** | `Project_Report_Automated_Web_Scanner.pdf` | Formal 8-page Capstone Project Report covering background, architecture, test results, and hardening guides. |
| **4. README File *** | `README.md` *(or `README_Automated_Web_Scanner.pdf`)* | Comprehensive documentation, CLI flags, security score table, and usage examples. |
| **5. GitHub Repository *** | `https://github.com/tsh471/automated-web-scanner` | Public GitHub repository with all code, tests, and documentation. |
